

tensorflow::serving  
::Executor

```
graph BT; A["tensorflow::serving::ThreadPoolExecutor"] --> B["tensorflow::serving::Executor"]
```

The diagram illustrates an inheritance relationship between two classes in the tensorflow::serving namespace. At the bottom is a gray-shaded box representing the base class, tensorflow::serving::ThreadPoolExecutor. A blue arrow points vertically upwards from this box to a white box at the top, which represents the derived class, tensorflow::serving::Executor. Both boxes have a black border and contain their respective class names in two lines.

tensorflow::serving  
::ThreadPoolExecutor
