

tensorflow::serving  
::Servable

```
graph BT; MockServable["tensorflow::serving::MockServable"] --> Servable["tensorflow::serving::Servable"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a box for 'tensorflow::serving::MockServable' with a light gray background. A blue arrow points upwards from this box to a box at the top for 'tensorflow::serving::Servable' which has a white background. This indicates that MockServable inherits from Servable.
